BEWARE! Our new West dock fill over-extended itself about six feet too far and ten feet too high. A flag marks the obstruction in the new basin entrance until it can be removed. The bulkheads of the new entrance are completed, so our docks will be sheltered during the fall storms. Next step is to provide catwalks in the new West dock area to accomodate boats next Spring. The stalls on the East side of the present East dock are just about all full. Arrangements are being made for a new, larger gasoline sales facility at the end of the East dock.
